FEBRUARY SPECIAL

UBETABRADEF1 – “Wet Scrub” in a bottle.

Dow has introduced a fast and easy way to get rid of surface contamination on the bonding area of glass. One of the biggest problems facing auto glass technicians today is the contamination on the glass. Manufacturing and packing residues can interfere with adhesive bonding. This is a potential source for leaks and adhesive failures, following a windshield installation.

Special Introductory Price of \$19.50 (limit 1 per customer)

Glass Facts:

Ford Transit Connect

IGD is pleased to announce the following new Carlite parts for the Ford Transit Connect being added to our product offering.

Transit Connect is a new small, fuel efficient delivery van /work vehicle from Ford of Europe. Since it's introduction to the North American market, demand is outweighing supply.
